

Traffic Problem Unchanged

State Government Slow In Bridge Construction

By Craig Wright

Barge Waggoner and Summer Company, a civil engineering company along with Kierggne, Green and Associates, a mechanical engineering company have been selected by the state government to design and construct the proposed Pedestrian Bridge.

The Pedestrian Bridge will start from the flower beds that are situated between the Industrial Building and Administration Building. The proposed overpass will be constructed of concrete arched pillars and steel on Centennial Blvd.

Designers and planners have completed 90% of the precise planning, whereas at the present, a general description was submitted: The over-pass will be approximately 85' in length, 10' wide, 16' height, including a ramp 64' 10" wide, extending to the walk way that is parallel to the library. The stairs on the right-hand side will extend to the walk-way that is parallel to the front of the Biology Building.

Mechanical engineers will install

the heating system, that will melt ice and snow during the winter, and light fixtures for visibility at night. Also, included will be a plate glass structure situated along the sides of the overpass that are above the street and the rest will be sided with fencing.

Upon completion of the plans, the highway commissioner will follow general procedures. The plans will be submitted to President Torrence, Student Government representatives and State Education Commissioner, for final approval and appropriation of funds.

Process of bidding for the proposed contract would have to be initiated, by concerned contractors, which could be a drawn-out procedure or end in an impasse.

The assigned contractors will proceed to construct the over-pass as soon as possible. Under normal conditions the bridge would be approximately finished within eight weeks and no later than the middle of the winter quarter.

Due to the Vietnam conflict, steel has been difficult to obtain, which could be a delaying factor. Another possible cause for delay is the dispute of whether to use steam or electric heat. Since the temperature and weather must be favorable.

(Continued on page 2)

An Artist's Conception of the Proposed Overpass

"Aristocrats" To Make 2nd TV Appearance

By Joselyn Senter

The "Aristocrat of Bands", the university marching band, under the directions of Frank T. Greer, Head Director; Daniel Owens, Chief Scorer and announcer for the band; and Marcus Rowland, Drill Master; will be televised for the second time this season during the Bishop College vs. Tennessee State University football game, November 22nd at Dallas, Texas.

The game, which is to be played in the Cotton Bowl, will feature the 126 marching unit at half-time, and will be televised locally

by the American Broadcasting Company.

The first appearance this year came during the half-time of the Cincinnati Bengals vs. New York Jets football game, which was played in Cincinnati, Ohio, on October 12th, and aired by the National Broadcasting Company. An "on-hand" crowd of 35,000 people watched the band, steered by Stanley Stewart, Lafayette Price, and James Fentress. The band's three drum majors along with the head majorette Constance

Russell, spelled out their "Working On A Groovy Thing" theme.

Before going to Dallas, the band will perform in Atlanta during the Morris Brown College vs. TSU game. The theme of the performance is "The Now Generation", which focuses upon the different aspects of the leader of tomorrow.

Past performance at home games this year have included, Albany State, Grambling, and FAMU, where the band shared the spotlight with their rival, the "Rattler" band, a 176 marching unit.

Torrence Announces Administrative Reorganizations

A reorganization of the administrative structure has been announced by President Andrew P. Torrence.

The reorganizations includes reducing the number of people reporting directly to the president from more than 15 to 4, changing the name of the institution, electing 12 student and faculty committees to replace existing committees, and electing a new faculty senate.

"The new structure is designed to promote a program of superior quality at Tennessee State University and increase the efficiency of operation," Dr. Torrence said.

Under an act passed by the 1969 session of the state legislature the official name of the institution was changed from Tennessee A & I State University to Tennessee State University.

From the 25 university wide committees, mostly composed of administrators and occasionally a student, Torrence said there will be twelve such committees elected by the faculty, most of which will have student representatives elected by the student body.

"Included in the 12 for the first time will be a faculty senate, which will deal primarily with academic policy," Dr. Torrence said.

Torrence

STUDENT POLL

TSU Students For Traffic Rerouting

The following cross-section of students were asked to give their opinions on the building of the proposed overpass.

Curtis Carswell, Sr. — I don't think the bridge should be built. The best solution is to reroute the traffic. The noise and odor from passing trucks will not be solved by an overpass.

Steve Miller, Sr. — One overpass is not enough. Between classes everyone will be crowded together trying to cross the one overpass.

Caroline Owens, Fresh. — I think the overpass will help, but some type of speed control is also necessary.

Leroy Fletcher, Jr. — I don't even believe an overpass is going to be built. The administration is just trying to pacify the students.

Wilber Hughes, Sr. — People will still have to cross the street at other points so this will not solve the problem. If the overpass is going to be built, 4 or 5 would be necessary.

(Continued on page 2)

Marching afront to the Aristocrats are l-r—Beverly Crisler, Gale Thompson, Jean Utley, Carol Gentry, Gail Choice, Regenia Shelton, Constance Russell, Jacqueline Smith, Linda Arnell, Wilma Caldwell, Myra Hill, Dolly McKissack and Linda Langster.

Will The Real AAHS Please Stand Up!

By Lloyd Dixon

Since it has been the policy of certain elements in the so-called Afro-American Heritage Society to make ardent efforts to manifest their influence in every facet of University endeavor (in other words, run everybody's business), this writer feels that the time has now come when a little advice should be rendered in their direction because it appears that something is missing in their basic structure.

In the first place, in every institution of higher learning having a functioning AAHS or reasonable facsimile thereof, their primary purpose is to simply make the Black populace aware of our heritage as Black people. This purpose also entails the process of making the organization as appealing to as many students as possible.

However, it appears that TSU's faction of the AAHS is completely satisfied with the faithful few that attend their meetings. Could it be that the vast majority of the student body is "hip" to the fact that the basic purpose of the organization is being misconstrued? That some other organization is operating under the guise of the AAHS? That there is some underlying purpose for the petition-passing or leaflet-spreading on issues irrelevant to Tennessee State University? These questions and other points of interrogation will possibly go unanswered.

The leadership of the AAHS has on many occasions openly and vociferously denounced certain organizations and especially the present Student Council administration for not supporting many of their policies. What organization can support a body whose actions are characterized by coercion, subversion, conspiracy, and outright deceit in attaining a goal?

In conclusion, this writer feels that for all practical purposes there should be a complete revamping of the AAHS to include any interested student, regardless of background, organizational affiliation, or "degree of Blackness". Furthermore, this writer feels that there should be a complete ouster of the present AAHS Leadership so that the existing one will be forced to find another "front" for their corruption, disruption and disorder of purpose, so that there can be an amalgamated, concerted effort to eradicate the problems of this institution.

STUDENT POLL

(Continued from page 1)

Valerie Oliver, Jr. — I think the overpass is a good idea.

Darnell McWhorter, Soph. — I don't like the idea. If they can reroute the traffic at Fisk the traffic can be rerouted here too.

Irma Alexander, Sr. — I think the overpass should be built. It will be a great benefit to the student body in traveling from place to place.

Ernestine Thomas, —r. — I think it would be nice if an overpass was built but I think the Administration is just trying to pacify the student body.

James Ford, Jr. — I don't think it will work. The big problem is the noise. You can't hear in class because of the trucks.

Ann Wilson, Sr. — The overpass needs to be built. It should have been built when I was a freshman.

Fredric Granger, Fresh. — What do the students need? A school guard to help them cross the street? Sure, the traffic is a problem, but there are a million other things that should receive preference over the building of an overpass . . .

BRIDGE

(Continued from page 1)

able for the laying of concrete, this can constitute another delay in the construction of the overpass.

By the use of steam we would be able to connect the system to our existing steam heating complex. Using electricity in the heating system would be an added expense to the construction of the overpass. However, electricity would be a convenience to the mechanical engineer because it is easier to install. Steam heat on the other hand could be installed cheaper.

The contents of this recent writing of the preceding statements are only at a tentative stage, always leaving room for negative variables in the completion of the whole project.

LETTERS TO THE EDITOR

Dear Editor:

It is in my opinion that many students are shying away from the Greek Empire and influence on this campus. We can contribute these feelings to the actions and positions taken by Greeks in general.

One point of strong animosity among the non-Greeks toward the Greeks, is the almost total isolation on the part of the Greeks against the non-Greeks, which at times seems to be strengthened by the Administration. It is time for the Greeks and the Administration to realize that others are on this campus and wish to be an active part of the student body. This campus is divided into various cliques, and as usual with the Greeks at the head, and fighting nowhere because they fail to include the student body as a whole.

The students are becoming aware that there is no significance to the organizations because they perform no definite service to the student body, community or this institution in general. With as many Greek organizations that are represented on this campus there could be more activities that would

(Continued on page 4)

"The Mod Squad Question"

Dear Editor:

One of the hottest conversation pieces among Tennessee State University students of late, has been the affairs of our local "Mod Squad". The "Squad" has generated a tremendous amount of dialogue because of its activities in and around campus. These quislings (traitors) who pose as average students have launched a massive offensive toward any acts of discontent among T.S.U.'s progressive student body.

If T.S.U. is to become a citadel of political awareness the "Mod Squad" must be considered a major obstacle to such an awareness. Every progressive minded student should be on the alert for men and women in incognito, who maintain constant surveillance on any change in the campus status quo. Members of this administrative sponsored group can be found throughout the environs of the campus. Most of the "Squad's" student members are located in the Student Union where large groups of students gather to converse on pressing issues affecting the general well being and reactionary structure of Tennessee State. By having a concentrated network of flunkies in the Student Union, the "Squad" tactfully acts as the "eye and ears" of those who are primarily interested in keeping Tennessee State an anachronism in the present "campus revolution".

Several members of this "negro" organization are known by this writer, but to keep this grave concern in its proper perspective I will refrain from exposing such human excrement until a later date. However, this does not mean the "Squad" will cease to occupy a position of paramount priority in my classification of "campus ills".

In conclusion I make an emphatic plea to all progressive and concerned students to be cognizant of the following Chinese adage in dealing with the "Squad" . . . "Know yourself and your enemy and you will live to fight a thousand battles without a single disaster."

John Cobb

SESSOMS TO HEAD HOUSING COMMITTEE

The University Housing Office is fortunate to have Frank Sessoms, Vice-President of the Student Council, to head a committee, composed of student leaders from each hall, for the purpose of working closely together to improve living conditions on campus. There is evidence that this procedure is working very well. Several Junior Counselors already have had conferences with the Housing Director to discuss observations.

According to Frank Sessoms, the committee is to assist the Housing Office in its effort to upgrade the housing facilities on campus and to offer advice and suggestions in this regard. He further states that it is the responsibility of each student on campus to help maintain the highest possible degree of decorum.

The Housing Staff is aware of the condition of residence halls and we shall work continuously to upgrade student housing and to see that your stay on campus is a comfortable, pleasant and rewarding experience.

Meter Changes To Aid Student Body

The Student Council legislative changes in the newspaper's policy will in effect be of an advantage to the general student body, according to Meter Co-editors Dwight Lewis and Lloyd Dixon.

The Meter, once a spasmodic publication, is scheduled to focus

Dixon

Lewis

upon more campus activities which will therefore entail more students, Lewis said.

The delay in the first issue was due to problems in acquiring a printer. The first half of the quarter was spent in bidding on an appropriate price to fit the school's budget.

The Meter, whose new office is located in the Student Union (Room 205), is attempting to focus less on teachers, alumnus, and administrators but more on the individual student.

"We have incorporated many new features designed to be of service to the student body," said Lloyd Dixon, Co-editor of the Meter. We will have classified advertising, more student opinion polls (student) guest editorials, more focusing on campus organizations, dormitory activities, and everything involving the student" he continued.

The Meter is a 5 column 210 line publication with 4 pages per issue and is presently operating with a staff of 12.

The office (Sub 205) is open between the hours of 9-12 and 1-4 daily. "We are actively recruiting new resourceful and energetic members," Dixon said. We meet every Monday night at 7:30 in the Meter office," he concluded.

NOW YOU ARE IN

Editor's Note: This is a reprint of Student Council President Earnest O. Gray's address to the freshman class.

Almost all colleges set aside a few days or a week before classes begin for what is known as "freshman and new student orientation." Though your entire precollege life, has been in a very real sense, orientation and preparation for college, each college wants to try, in its own way, to ease its students' transition from school to college. We here at Tennessee State University are no different.

During our orientation program we wish

1. to make you feel welcome,
2. to acquaint you with the physical characteristics of the university,

3. to introduce you to individuals who can help you,

4. to obtain, through special tests, information about you which will be used in counseling you and placing you in proper courses,

5. and to introduce you the over-all elements of what I shopefully to become the genesis of a reputable beginning for the graduating class of 1973.

Yes, you are in: for you have received that long awaited letter of acceptance from the Dean of Admissions and Records. But wait; consider carefully the question **WILL I STAY IN?** Your acceptance to Tennessee State University is contingent upon three things basically:

1. Your ability to conduct yourselves in an acceptable manner

2. Your ability to adjust to a collegiate environment.

3. and continuing your good academic work.

You see, the fact of the matter is that each year in June, Tennessee State University rejects students it has accepted earlier in the year because of poor academic performance. A student is subject to be rejected, or rolled as it is commonly referred to, at any point during the year for any violation of any rule or regulation as set forth by the student handbook. It was a very short time ago, it almost seems like yesterday, that I was sitting where you are now seated. And as you are doing, I was listening to the address of the Student Council President. I remember many of the things that he said, but one thing in particular struck me in a special way. He said, and I ask of you, to look now at the persons sitting to your immediate left and right and remember those persons. Look for them at the end of the year. Some of you will find them; many of you will not.

Why? Because it takes guts; it takes purpose; it takes courage and ability to survive.

One of the major factors of survival is a well balanced system of values. In one's value system there should be a time for everything. There is nothing wrong with partying as long as you don't let it dominate you. I party, and I know many of my successful colleagues who party. We can do the drop, the yolk, the funky chicken, the muscle man, the popcorn and anything else; but we can also drop

(Continued on page 4)

"DORMITORY SPOTLIGHT"**"Why Are There Three Girls In One Room?"**

By Marilyn James

This has been a question by nearly all of the residents in WRC.

In an interview with Clyde Bond, Director of Housing, this reporter was told, "Due to the lack of space and the above average number of freshmen who registered, coupled with the absence of one women's dormitory, have caused this over crowded condition (Hale Hall is not being used this year because of the repairing that needs to be done)."

A memorandum has been sent to all residence halls asking the dormitory officials to send a list of vacant rooms and overcrowded ones. The housing department is presently working on room statistics. Girls who live in single rooms will presently get a roommate.

However, as a Sophomore at TSU, I personally feel that if there were another woman dormitory there would still be three girls in a room. Last fall with Hale Hall in use and the student population was approximately the same, there were still three in a room.

Mr. Bond also professed a desire to see every student happy and comfortable.

It should be noted, however, that students may live two to a room only if vacancies makes it convenient to place these students.

To be technical with the situation, the students should live two to a room for these reasons: (1) It would eliminate most of the con-

fusion and frustration. (2) The students deserve to be as comfortable as possible, and (3) It creates a pleasant and warm atmosphere among students. (4) It will give the students adequate space to place their belongings and (5) It gives the students a better opportunity to get acquainted so that they can be more intimate in their thinking, their ideas and their experiences.

When students come to college, I feel that the dormitory should reflect the idea of their dwellings at home. We already have to make certain adjustments to certain rules and regulations that we normally would not have to; so why make it more uncomfortable and more difficult by overcrowding the rooms.

Student Parker Enemy No. 1 Prepares For Another Day's Work

Student Parking

By Billy Gittens

The beginning of new school year brings along new problems. One old problem, Student parking, has reached paramount proportions this year with the influx of hundreds of driving students.

Student parking comes under jurisdiction of the Department of Security and Safety, headed by Mr. J. R. Robinson. This reporter had occasion to interview officer Robinson and I received some very interesting information that should be common knowledge to all driving students.

There are 10 lots on Campus housing approximately 1,200 cars. Only 4 lots are open to students, lots G, G-1, G-2, and G13.

Lot G—is located behind the Graduate Building

Lot G-1—is located in front of Watson and Clement Halls

Lot G-2—is located behind the old Cafeteria

Lot G-3—All parking around WRC area

The favorite lot of students, is Lot B located in front of the Graduate Building. This lot is reserved for Faculty and Staff only.

The parking program is at a standstill awaiting a decision from the parking commission appointed by President Torrence. The responsibility of this commission is to advise the president on what should be done in reference to parking. The committee was a result of the parking problems faced last year. The auto decals for the school year are in the Safety office (Continued on Page 4)

Martin Readies For 2nd Year As Cage Head

By Dwight Lewis

Although Theodore McClain will be back this year, Tennessee State's basketball coach, Ed Martin, feels that his team is still a year away.

Martin, in his second year as head coach, stated that he believes this year's team will be better than last (14-12) season's.

One reason he gave for feeling that the team is still a year away

Theodore McClain

is because with him just taking over last year, all the players were just like freshmen. Installing a junior varsity team this season, Martin has 25 hardwood artists trying out for a varsity slot. Moving up to the traveling squad will be almost impossible for players who were not on it last season because Martin has 8 of 10 varsity players back this year.

The Vietnam Death Count Rises

Washington—As of the first of October, 38,823 Americans had died in the War in Vietnam since this country began its involvement in 1961. More than 250,000 Americans have been injured.

The deaths included: 20,542 from the Army, 932 from the Navy, 10,840 from the Marine Corps, and 384 from the Air Force, for a total of 32,698 in combat deaths. The Defense Department says the "other Free World forces" have lost 3,344 lives, the South Vietnamese armed forces 94,633 persons have died in the Vietnam War since the U.S. became involved.

McClain, an all-American as a Sophomore last year, will lead this season's team along with Juniors—Ronald Dorsey, Charles (Tony) Moorman, and Willie Fisher; Sophomores Robert Mathis, Lloyd Neal and Claude Grant. The three top Freshmen on this year's team will probably be Robert Harris of Atlanta, Jethro Brown of East St. Louis, and Harold McCorkle of Durham, N.C.

Martin added in closing that the players have been working very hard to have a great season.

STUDENT PARKING

(Continued from Page 3)

now. President Torrence is presently meeting with student leaders to work out an equitable price for the sticker. They were \$4.50 last year for students and you can rest assured that inflation's sticky hand has touched the safety office. The stickers cost this year might be as high as \$6.00 or \$2.00 a quarter.

The stickers entitles the student to park his or her car in an assigned area. The stickers bear the number of the area chosen. A student cannot park a car in any other lot than the one he is assigned.

To meet this ever growing problem, new parking lots are being considered on the North Side of campus presumably behind WRC and Hankal Hall.

If you have a car on campus it must be registered with the university. The parking commission's report should be on the president's desk shortly, so, start nickeling up now for an auto sticker. "The most efficient parking system ever has been set up by our safety Department. The full cooperation of all students and faculty is essential," says J. R. Robinson.

In essence, all of the best parking places are reserved for the Faculty and Staff. Even the proposed parking lots are not even accessible to classes. This writer sees a problem now and even a bigger problem for the future.

NOW YOUR ARE IN

(Continued from page 2)

by the library and yolk open those textbooks.

Show Tennessee State University that you are filled with hot buttered soul and that you can maturely and responsibly spread that butter as you slowly walk on by to reap the benefits of her bountiful goodness. Show her that you can get down to the real nitty-gritty by applying yourselves to the fullest.

Let there be no doubt in your mind of the value of a good education. In a society such as ours where scientific and technological advances are so prevalent, where the black man is placed under such strenuous oppressions, the only guarantee of a profitable future and prosperous livelihood is a good education. Your degree of success or failure depends entirely upon you. There will be periods of depression, of discouragement: there may even be times when you simply want to quit. But if you will just put forth that extra effort, you will never regret it. It is my belief that life is a grind stone; whether it grinds you up or down is dependent upon of what you are made.

Give Tennessee State University your best and she will give you in return the tools necessary to go

REESE LEADING TIGER RUSHER

Senior setback Wayne Reese is on his way to a second consecutive rushing title.

Reese, 5' 11", 205 lbs. from New Orleans, La. is the leading Tiger rusher in 6 ball games. He has carried the ball 94 times for a net gain of 321 yards. Adding to this, Reese is the team's second leading scorer with 36 points and second in total offense.

Junior Jacob Mayes, leads the team in scoring with 38 points and is the team's second leading rusher with a net gain of 209 yards. Mayes who is having his best season since being at Tennessee State, has been the most improved player on this season's team.

Sophomore Quarterback Joe Gilliam, is the leading passer with 55 completions in 116 attempts for a total of 887 yards and 7 touchdown passes.

Clifford Brooks, also a sophomore quarterback, has completed 20 of 51 passes for 343 yards and 4 touchdowns.

Leading in the pass-receiving department is Joe Scales who has

successfully out into the world and be the leaders of tomorrow.

On behalf of the student body of this great institution, I proudly welcome you. It is my hope that you will in keeping with our motto ENTER TO LEARN, AND GO FORTH TO SERVE.

caught 17 passes for 254 yards and 1 touchdown.

Senior, Joe (Turkey) Jones leads the team in defense.

JONES

"WINTER DREAMS"

by Joseph K. Shaw

Winter has come, with perfect timing,

Because the summer has grown old and has lost its beauty.

Look at the earth laden with snow and surrounded by tranquility.

Look at the children, building snowmen and making harmless play.

Oh yes! Winter has come with its chilly mornings and its freezing nights,

But only Winter can make peace, and warm the hearts of mankind, and make gentle the land.
